Myth of Mobile User

EDUCATION

Any activity that allows individuals to be more productive when consuming, interacting, or creating information, mediated through a compact digital portable device...

Clark N. Quinn in *The Mobile Academy*

Mobile Learning

Shifting the way we learn and teach in Higher Education

We are called on as teachers to teach them how to use these technologies effectively [...]
Teaching mobile web literacy seems to me as crucial as teaching basic literacy.

David Parry. Mobile perspectives: On teaching mobile literacy.

Information Literacy

Teach students and faculty
how to
use mobile apps and mobile
websites
to access, retrieve, evaluate
and use reliable information

Mobile Information Literacy

Table 2.1 *Differences between fixed and mobile information literacy*		
	'Fixed' IL	**'Mobile' IL**
Where	Largely in 'set' places. At a desktop computer (with little variation in software); at a fixed workplace; within a library.	Anywhere; any mobile device (phone, games device, e-book reader – massive variation in devices).
What	Anything and everything.	Normally quickly found information, often context or location specific.
How	Range of established tools to access and manage a wide range of information sources. Standard search engines.	Often narrow apps and individual specialist sites rather than open web.
Time spent	Varies. Often slow, long access. People spend long periods searching for, organizing and extracting information, especially for academic use.	Short only. Quicker searches. Little pondering and extracting of information. Favours short chunks of information, 'convenience' of device.

Andrew Walsh in *Using Mobile Technology to Deliver Library Services: A Handbook*
